Educational Service Unit 1

Learning Management System (LMS)

Dr. Bob Uhing indicated that if/when students attend the Friday Career Academy Lab at NECC on Fridays, they would need to continue their required course work at Creighton High School through the use of an LMS. With this YouTube video, I will further explain what an LMS is and show you a sample of an LMS and how it works. Creighton High School uses a similar LMS called eBackPack.

Learning Management Systems

Chris Good, ESU 1

What is a LMS and how does it work?

- Provides a venue for the creation of a virtual classroom.
- Allows for anytime, anywhere, any device access to content.
- Provides storage of content for instructors.
- Assists in the organization and communication of classroom content and expectations.

Why use a LMS?

- Online course experiences for students
 - College and career ready
 - Students' "wheelhouse"
- Scheduling conflicts
- Extra curricular activities
